TITLE: Advanced Training and life Long learning Program in Applied Health Sciences

DESCRIPTION: The purpose of the project is to reform and modernize a flexible inter-disciplinary training and professional life long program and diploma (LTP) in applied health sciences. A flexible training and diploma will be issued by the partner institutions offering the integrated study program. It is a Lifelong Learning Program to enable people at all stages of their lives to take part in stimulating learning experiences and helping to develop strong institutional and individual capacity building across Sothern Neighbouring Area (ENPI South).

Specific objectives of the project are:

1. Identifying the SWOT (Strengths, Weaknesses, Opportunities & Threats) of the existing training programs, including academic and non-academic staff skills
2. Introducing and modernising of the training curriculum, teaching material and exam methods as base for creating the new training and diploma program in Health Sciences
3. Train/retrain a number of university and non-university staff, trainees and trainers (TOT)
4. Establish a sustainable virtual health care quality training centre (VQC) for Health care sector.
5. Promote the university-industry-society partnerships by jointly establishing of vocational training centres
6. Dissemination of the results

The program is based on advanced information and communication technologies (ICT) and existing EU expertise.

The program is a multi-functional program focused on the University- Industry-Society partnerships. The main target groups are university and industry staff, health professional, students, ministry and hospitals staff and other stakeholders. Priority is also given to women.

The main outputs and outcomes:

1. SWOT Analysis
2. Updated and modernised Training and course modules
3. Developed, tested and implement of the Health science training programme
4. Modern and effective teaching and training programs and methods
5. Develop Joint University-Industry Training centres
